★ AN AUTHORITATIVE AND READABLE
GUIDE TO BOOK SELECTION

BRITISH BOOK NEWS

Here is a reliable aid to the selection of books published in the United Kingdom and Commonwealth. In each issue of this monthly journal experts review some 250 'recommended' books of all kinds, including fiction and children's books, all of which are classified and indexed. In addition, each issue contains an article of general literary interest or a survey

of the literature of a particular subject. A valuable feature is the 4-page inset listing important forthcoming books two months ahead of publication.

ANNUAL SUBSCRIPTION:

United Kingdom	- 30s.
U.S.A. and Canada	- \$4.25

ALPHABETICAL
AUTHOR, TITLE AND SUBJECT
SECTION

**When you wish to know what books are available on a subject or by an author
consult this index first**

ALPHABETICAL AUTHOR, TITLE AND SUBJECT SECTION

This Section contains entries or reference entries under authors, titles, editors, translators, series and subjects in one alphabetical sequence.

The entry under the author gives, in an abbreviated form, most of the information to be found in the entry in the Classified Subject Section, so that for most purposes it is not necessary to refer back to that entry when the author of a book is known. If, however, a fuller description is required, the entry in the Classified Subject Section—which gives the fuller description—can be found by means of the decimal code number at the end of the author entry.

If the editor, translator, title or series only is known, it will be necessary to refer back to the entry in this Section under the author's name. For example, if you look up the title *Oliver Twist* you will find the entry:

Oliver Twist. See Dickens, Charles.

To find details of this book and its decimal code number, it is necessary to refer to the entry in this index under

Dickens, Charles. *Oliver Twist.* Dent, 6/-, 823.8 (B57-3543) •

If you wish to know what books have been published on a particular subject it is necessary to consult this Section under the name of the subject. Here again you will find a decimal code number which must be sought in the Classified Subject Section.

It will be found most convenient to look up the specific name of the subject, for this will refer you directly to the decimal code number under which books on the subject you require may be found. It does not matter, however, if you look up another word so long as it is, in fact, concerned with the subject. You will find that the decimal code number for this word will refer you to a part of the Classified Subject Section so close to the subject which you actually require that the eye will be quickly led to it by the captions and "feature words" appearing against the numbers.

Even though you may become familiar with the arrangement of the Classified Subject Section, it is always advisable to consult this index.

An explanation of the abbreviations used in describing books in the Bibliography and further details for tracing information are given in the Preface.
